***“Medical Aesthetics helps women say goodbye to cellulite”***

Scottsdale, Ariz. — Medical Aesthetics is pleased to announce that it is offering the newest technology for the women of Arizona: Laser Cellulite Removal.

Lisa Williams, a certified Nurse Practitioner, is the only medical personnel in Arizona to offer this FDA approved laser procedure.

Packages for the Laser Cellulite Removal can be

purchased at \$1,000.00 for 12 treatments, and is done approximately 1-3 times a week.

The Laser Cellulite Removal machine operates by massaging connective tissues under the skin in order to loosen it. At the same time the laser is massaging, it also heats the skin (including the layers of fat beneath it), resulting in the break down of fat pockets.

This increases circulation and allows cellulite to disappear.

“85% of women have cellulite,” states Williams. “This procedure can be an alternative to, as well as complement, liposuction. The laser

is amazing for accelerating the tightening of the skin, and thus eliminating cellulite. The response has been enormously positive.”

For more information patients can call 480-998-0333, extension 246 to make an appointment or schedule a consultation.
